CONTENTS OF VOLUME 3

Part 1, October 1957

Static pressure distribution in the free turbulent jet, by David R. Miller and Edward W. Comings 1
On almost rigid rotations, by K. Stewartson 17
On the instability of small gas bubbles moving uniformly in various liquids, by R. A. Hartunian and W. R. Sears 27
The reflection of pressure waves of finite amplitude from an open end of a duct, by George Rudinger 48
Diffusion in free turbulent shear flows, by G. K. Batchelor 67
The laminar and turbulent mixing of jets of compressible fluid. Part II. The mixing of two semi-infinite streams, by L. J. Crane 81
Two-dimensional subsonic and sonic flow past thin bodies, by J. B. Helliwell and A. G. Mackie.. 93
Reviews 110

Part 2, November 1957

The fundamental solution for small steady three-dimensional disturbances to a two-dimensional parallel shear flow, by M. J. Lighthill 113
Skin friction on a strip of finite width moving parallel to its length, by Harold Levine 145
The asymptotic expansions at large Reynolds numbers for steady motion between non-coaxial rotating cylinders, by W. W. Wood .. 159
The supersonic motion of an aerofoil through a temperature front, by J. W. Craggs 176
On the generation of surface waves by shear flows, by John W. Miles 185
On the fine structure of turbulent flows, by R. Betchov 205
Note on the position of ring singularities in an axisymmetric potential field, by N. T. Bloomer 217
Reviews 221

Part 3, December 1957

Some shock tube experiments on the chemical kinetics of air at high temperatures, by Saul Feldman 225
The diffraction of a rarefaction wave by a corner, by J. B. L. Powell .. 243
A note on Mott-Smith's solution of the Boltzmann equation for a shock wave, by Akira Sakurai 255
The flow of swirling water through a convergent–divergent nozzle, by A. M. Binnie, G. A. Hookings and M. Y. M. Kamel 261
The structure of a shock wave in a fully ionized gas, by J. D. Jukes .. 275
On fully-dispersed shock waves in carbon dioxide, by Wayland C. Griffith and Anne Kenny 286
The instability of a shear layer between two parallel streams, by Robin E. Esch 289
The effect of a magnetic field on Stokes flow in a conducting fluid, by W. Chester 304
The impact of a shock wave on a movable wall, by R. F. Meyer .. 309
Reviews 324

Part 4, January 1958

Flow past a flat plate at low Reynolds numbers, by E. Janssen .. 329
Further space-time correlations of velocity in a turbulent boundary layer, by A. J. Favre, J. J. Gaviglio and R. J. Dumas 344
A simple derivation of Lighthill's heat transfer formula, by H. W. Liepmann 357
Turbulent flow in a stably stratified atmosphere, by A. A. Townsend 361
The minimum Reynolds number for a turbulent boundary layer and the selection of a transition device, by J. H. Preston 373
Two-dimensional flow at high subsonic speeds past wedges in channels with parallel walls, by J. B. Helliwell 385
Slow motion of a paraboloid of revolution in a rotating fluid, by L. V. K. Viswanadha Sarma 404
On the series that represent tides and surges in an estuary, by J. Proudman 411
Some properties of boundary layer flow during the transition from laminar to turbulent motion, by S. Dhawan and R. Narasimha .. 418
Reviews 437

Part 5, February 1958

The behaviour of a Pitot tube in transverse shear, by P. O. A. L. Davies.. 441
Flow in shock tubes with area change at the diaphragm section, by R. A. Alpher and D. R. White 457
The effects of a sound wave on the compressible boundary layer on a flat plate, by C. R. Illingworth 471
Non-linear interactions in a viscous heat-conducting compressible gas, by Boa-Teh Chu and Leslie S. G. Kovásznay 494
A model of supersonic flow past blunt axisymmetric bodies, with application to Chester's solution, by M. D. Van Dyke 515
The effect of a vertical lapse rate of temperature on the spiral flow of a fluid in a heated rotating cylinder, by G. N. Lance 523
Properties of the Hugoniot function, by Robert D. Cowan 531
Reviews 546

Part 6, March 1958

The flow of a compressible fluid with weak entropy changes, by Roy Gundersen 553
An experiment on free thermal convection of water in saturated permeable material, by R. A. Wooding 582
An approximate boundary layer theory for semi-infinite cylinders of arbitrary cross-section, by E. Varley 601
Cavitating flow about a wedge at incidence, by A. D. Cox and W. A. Clayden 615
A discussion of higher-order approximations for the flow field about a slender elliptic cone, by Roberto Vaglio-Laurin and M. D. Van Dyke 638
Some generalizations in steady one-dimensional gas dynamics, by J. A. Shercliff 645
Reviews 658
